# Annual Assessment

## Mathematics

### Program Profile

#### Program Mission Statement

*Please insert your program mission statement here*

The mission of the Mathematics program is to provide an environment where students can learn and become accomplished users of Mathematics and Mathematical application. The program contributes to the development of students as Mathematical thinkers, enabling them to become life-long learners, to continue to develop in their chosen professions, and to function as productive citizens.

#### Program Data

##### Delivery Method

Traditional On Campus (selected)  
Online  
Hybrid

##### Students Majors 2015-2016

4

##### Student Minors 2015-2016

4

##### Student Majors 2016-2017

5

##### Student Minors 2016-2017

4

##### Concentrations 2015-2016

*If your program contains concentrations, please list the concentrations and the number of students identified within each concentration.*

##### Concentrations 2016-2017

*If your program contains concentrations, please list the concentrations and the number of students identified with each concentration.*

##### Student Demographics

*Program goals for student retention, persistence and degree completion are? What do the persistence numbers mean to the faculty in the program? Are your persistence numbers what you expected? If not, how could the numbers be improved? What is the optimal enrollment for the program?*

##### Is the Program Externally Accredited

Yes

No (selected)

### External Accreditation

*Name the Accrediting Agency or entity including the last review/approval. Is there an accrediting body for the field of study? If yes, what is the name of the group. Is the program seeking accreditation? If no, why?*

There is no outside accreditation for Mathematics.

## Program Assessment

### Standard/Outcome

| Identifier       | Description   |
|------------------|---|
| <b>WWU2016.1</b> | Major Field Competence: Students will demonstrate excellence in an academic or professional discipline, and engage in the process of academic discovery.  |
| <b>WWU2016.2</b> | Ethics: Students will exhibit values and behaviors that address self- respect and respect for others that will enable success and participation in the larger society.                              |
| <b>WWU2016.3</b> | Self-Liberation: Students will develop an honest understanding and appreciation of themselves and others resulting in an ability to make individual decisions.                                      |
| <b>WWU2016.4</b> | Lifelong Education: Students will possess an intellectual curiosity and desire for continual learning both within and beyond formal education in preparation for participation in a global society. |

### Additional Standards/Outcomes

| Identifier   | Description   |
|--------------|---|
| <b>MAT.1</b> | Apply mathematical concepts, methods and tools in solving problems pertaining to the world at large.  |
| <b>MAT.2</b> | Model rates of change and accumulation of various quantities and find conditions under which those quantities are optimized in both discrete and continuous settings. |
| <b>MAT.3</b> | Identify and demonstrate pattern and structure inherent in performing different operations on mathematical objects.   |
| <b>MAT.4</b> | Analyze situations involving multiple objects and constraints using multidimensional space.   |
| <b>MAT.5</b> | Demonstrate the dependence or independence of mathematical statements upon their axiomatic framework.   |
| <b>MAT.6</b> | Exhibit competence in various methods of analytic proof.  |
| <b>MAT.7</b> | Accurately use algorithms in appropriate contexts.  |
| <b>MAT.8</b> | Demonstrate the existence of numerical, geometric, and symbolic trends and make conjecture based on those trends.   |

### General Education Alignment to Program

*How do the General Education criteria align with the Program Objectives? What courses within your program build upon skills learned in general education courses (please list the program course and the general education criteria). The General Education clusters are: Critical Analysis, Creative Expression, Quantitative Inquiry, and Society & the Individual. See attached for more detailed breakdown.*

**Communication:** Mathematics majors need to have communication skills to present steps in a problem clearly. They also need to be able to communicate their understanding of Mathematical concepts to others, both in written and spoken form.

**Critical Thinking:** Critical thinking is required in all Mathematics courses to analyze and construct Mathematical proofs of concepts.

**Meaning:** Students are required to read chapters in their textbooks in all courses, and identify central themes and underlying meaning. They often need to identify central themes of individual courses as well.

**Ethics:** Ethics is often a major concern in Statistics courses. Data should not be modified to meet the desired goals, nor should testing processes be developed to achieve a certain goal.

**Historical Perspective:** Mathematics is a sequential process, so the historical perspective on how these processes are achieved is often studied. Also, we often investigate particular results or theorems and the process of their development.

**Fine Arts:** Mathematics is often a visual process, requiring an understanding of geometrical shapes and curves. While artistic ability is not always required for this, it can assist in visualizing these concepts.

**Natural Science:** In the Mathematics courses, applications to other disciplines are often studied. Fields of natural science such as Physics and Biology frequently require Mathematical concepts.

**Social Science:** Statistics are often needed to analyze data collected in Social Sciences such as Psychology and Sociology. Also, economics often requires analyzing financial data.

**Diversity:** Many Mathematical concepts were developed by cultures other than our own. Mathematics is often considered the “universal language”, meaning it is the result of the collective human experience.

## Assessment Findings

### Assessment Findings for the Assessment Measure level for CURRICULUM MAP

MAT.1 Apply mathematical concepts, methods and tools in solving problems pertaining to the world at large.

#### Student Performance Review

| Assessment Measure        | Criterion   | Summary  | Attachments of the Assessments | Improvement Narratives |
|---------------------------|---|--|--------------------------------|------------------------|
| Direct - Portfolio Review | Has the criterion 80% received a score of 3 or higher on the 4 point scale for the Mathematics assessment rubric been met yet?<br>Met | All five of the Mathematics majors received a score of 3 or higher on the 4 point scale for the Mathematics assessment rubric. |                                |                        |

**MAT.3 Identify and demonstrate pattern and structure inherent in performing different operations on mathematical objects.**

**Student Performance Review**

| <b>Assessment Measure</b> | <b>Criterion</b>   | <b>Summary</b>   | <b>Attachments of the Assessments</b> | <b>Improvement Narratives</b> |
|---------------------------|--|--|---------------------------------------|-------------------------------|
| Direct - Presentation     | Has the criterion 80% of the students will receive a score of 3 or higher on a 4 point scale for portfolio presentation been met yet?<br>Met | All five of the Mathematics majors received a score of 3 or higher on the 4 point scale for the Mathematics assessment rubric. |                                       |                               |

**MAT.4 Analyze situations involving multiple objects and constraints using multidimensional space.**

**Mat 224**

| <b>Assessment Measure</b> | <b>Criterion</b>   | <b>Summary</b>   | <b>Attachments of the Assessments</b> | <b>Improvement Narratives</b> |
|---------------------------|--|--|---------------------------------------|-------------------------------|
| Direct - Final Exam       | Has the criterion 80% of students will achieve a score of 80 percent or higher on the Calculus III final exam been met yet?<br>Met | Four of the five students enrolled (80%) achieved a score of 80 percent or higher on the Calculus III final exam. If only Math majors are included, three of four (75%) achieved the 80 percent threshold. |                                       |                               |

**MAT.5 Demonstrate the dependence or independence of mathematical statements upon their axiomatic framework.**

**Mat 313**

| Assessment Measure  | Criterion   | Summary  | Attachments of the Assessments | Improvement Narratives |
|---------------------|---|--|--------------------------------|------------------------|
| Direct - Final Exam | Has the criterion 80% of students will achieve a score of 80 percent or higher on the Mathematical Statistics final exam been met yet?<br>Met | All five of the students enrolled (100%) achieved a score of 80 percent or higher on the Mathematical Statistics final exam. |                                |                        |

**Student Performance Review**

### Analysis of the Assessment Process

*Describe your assessment process; clearly articulate how the program is using course work and or assessment day activities for program assessment. Note any changes that occurred to that process since the previous year. Discuss what activities were successful at assessment and which ones were not as helpful and why. Please include who met to discuss the changes (unless you are a program of one person) and when you met. – Include a discussion on the process for collection and analysis of program data.*

#### Analysis of Assessment:

The process of the student portfolio and individual interview has worked well for the Mathematics majors. It allows them to reflect on their prior coursework and to practice interview skills that will be needed in future career work. All students met the benchmark established for success. Several of the objectives have not been assessed yet, due to the courses not yet being offered. These objectives will be assessed and analyzed in coming years.

The faculty is working with Central Methodist University to develop a test for graduating seniors to better assess performance. This exam would be used in place of the Major Field Test that was used this year. Faculty at both institutions, along with faculty at other campus, have felt the MFT does not present a good representation of the knowledge expected of a typical undergraduate Mathematics student.

### Analysis of the Assessment Process (Empirical & Non-Empirical) (HLC4B3)

The faculty will analyze and report on the assessment process in May after receiving results from the senior performance days and data from the student interviews.

### Program Changes Based on Assessment:

The faculty has considered replacing MAT 324, Formal Logic, with an Advanced Calculus course for the program requirements. Many graduate Mathematics programs require an Advanced Calculus course in their requirements, and this would give our graduates an advantage. Many of the concepts of the Formal Logic course are also covered in the HUM 107 Critical Thinking course, which many majors take as a General Education requirement. The faculty will not propose this change for the 2015-16 school year, but may consider it in future years.

#### Improvement Narrative List

#### Assessment Findings for the Assessment Measure level

No improvement narratives have been added.

### Program Activities

#### Student Performance Review

*Describe the department assessment day activities if not already described previously. Please articulate the nature of the assessments are conducted, explain the process for assessment that happens on these two days. Include the schedule of assessment day for your program. What does the data and outcomes tell you? What changes will you make as a result of*

*the data? What areas are successful for the program?*

## Student Performance Day Activities (Assessment Day):

On February 21, the Mathematics department held the second annual induction ceremony of our Missouri Xi chapter of Kappa Mu Epsilon. KME is a national Mathematics honor society with over 150 chapters nationwide. Our inductees were Mathematics majors, Briley Browning, James Rogers, and Bailey Ward; two non-majors who have taken a variety of Math courses: Alexis Bailey and Kelsey Scherder; and Mathematics faculty member Raymond Hune. Attendance was required for all Mathematics majors. Afterwards, a reception was held.

On February 22, the department held individual interviews with each of the majors. Along with the three majors mentioned above, we also spoke with Rhett Gauch and Mikayla Maple Laburay. We also spoke with two Physics majors, Katie Athanson and Glen DesBouillons. Mathematics faculty Chris Schneider and Raymond Hune and Physics faculty Vern Hart conducted the interviews. We were assisted by outside assessors Dennis Nickelson, a retired WWU faculty member, and Gerald Robinett, of the Missouri Department of Revenue. Each student was scored on the rubric, attached to this report, and received an individual report of their progress later in the semester.

### Student Performance Review Schedule

*Upload the program schedule for students during Performance Reviews.*

### Senior Showcase

*Describe program Senior Showcase activities if not detailed previously in the report? What benefit does the program gain from the activities? What if any assessment of students happens during this event? What changes if any will occur due to what is learned by faculty on Senior Showcase?*

No seniors will be graduating in Mathematics in the 2016-17 school year, so no Senior Showcase activities will be presented.

### Assessment Rubrics

*Upload rubrics used for Senior Showcase or Student Performance Reviews for student assessment.*

Mathematics\_Assessment\_Rubric.doc

### Service Learning

*Does the Program include projects/ course content that uses the philosophy of service learning?*

Yes

No (selected)

### Service Learning Component

*If so, how is service learning infused in the coursework within your department? Is service or community engagement in the program mission? Describe the Service Learning Activities that your students and department engaged in this past year. How did the activities improve student learning? How did the activities benefit the community?*

There have been no Service Learning Activities for Mathematics.

### LEAD Events

*Highlight lead events sponsored by program faculty that are connected to program or general education objectives for the past academic year. Include a total number of lead events program faculty sponsored.*

### Student Accomplishments

*Highlight special examples of student successes in the field (academic: mentor-mentee, conference presentations,*

*competitive internship, journal acceptance; extra-curricular: horse show championship, art exhibit). This is for any accomplishments that a student achieved outside of course work or the normal expectations of student success.*
